

INFLATION OF WORK HOURS

Prevalence: Hard or soft timesheets where employees are required to key in their hours worked manually.

Our Research suggests 43% of workers admit to padding timesheets.

SOLUTION:

Biometric Time Clocks systems ensure that employees can only clock in and out using their unique biometric data.

BUDDY PUNCHING

Prevalence: Manual, outdated systems such as punch-cards and paper-based systems.

SOLUTION:

Geofencing prevents employees from clocking in or out unless they're within the geofence boundary.

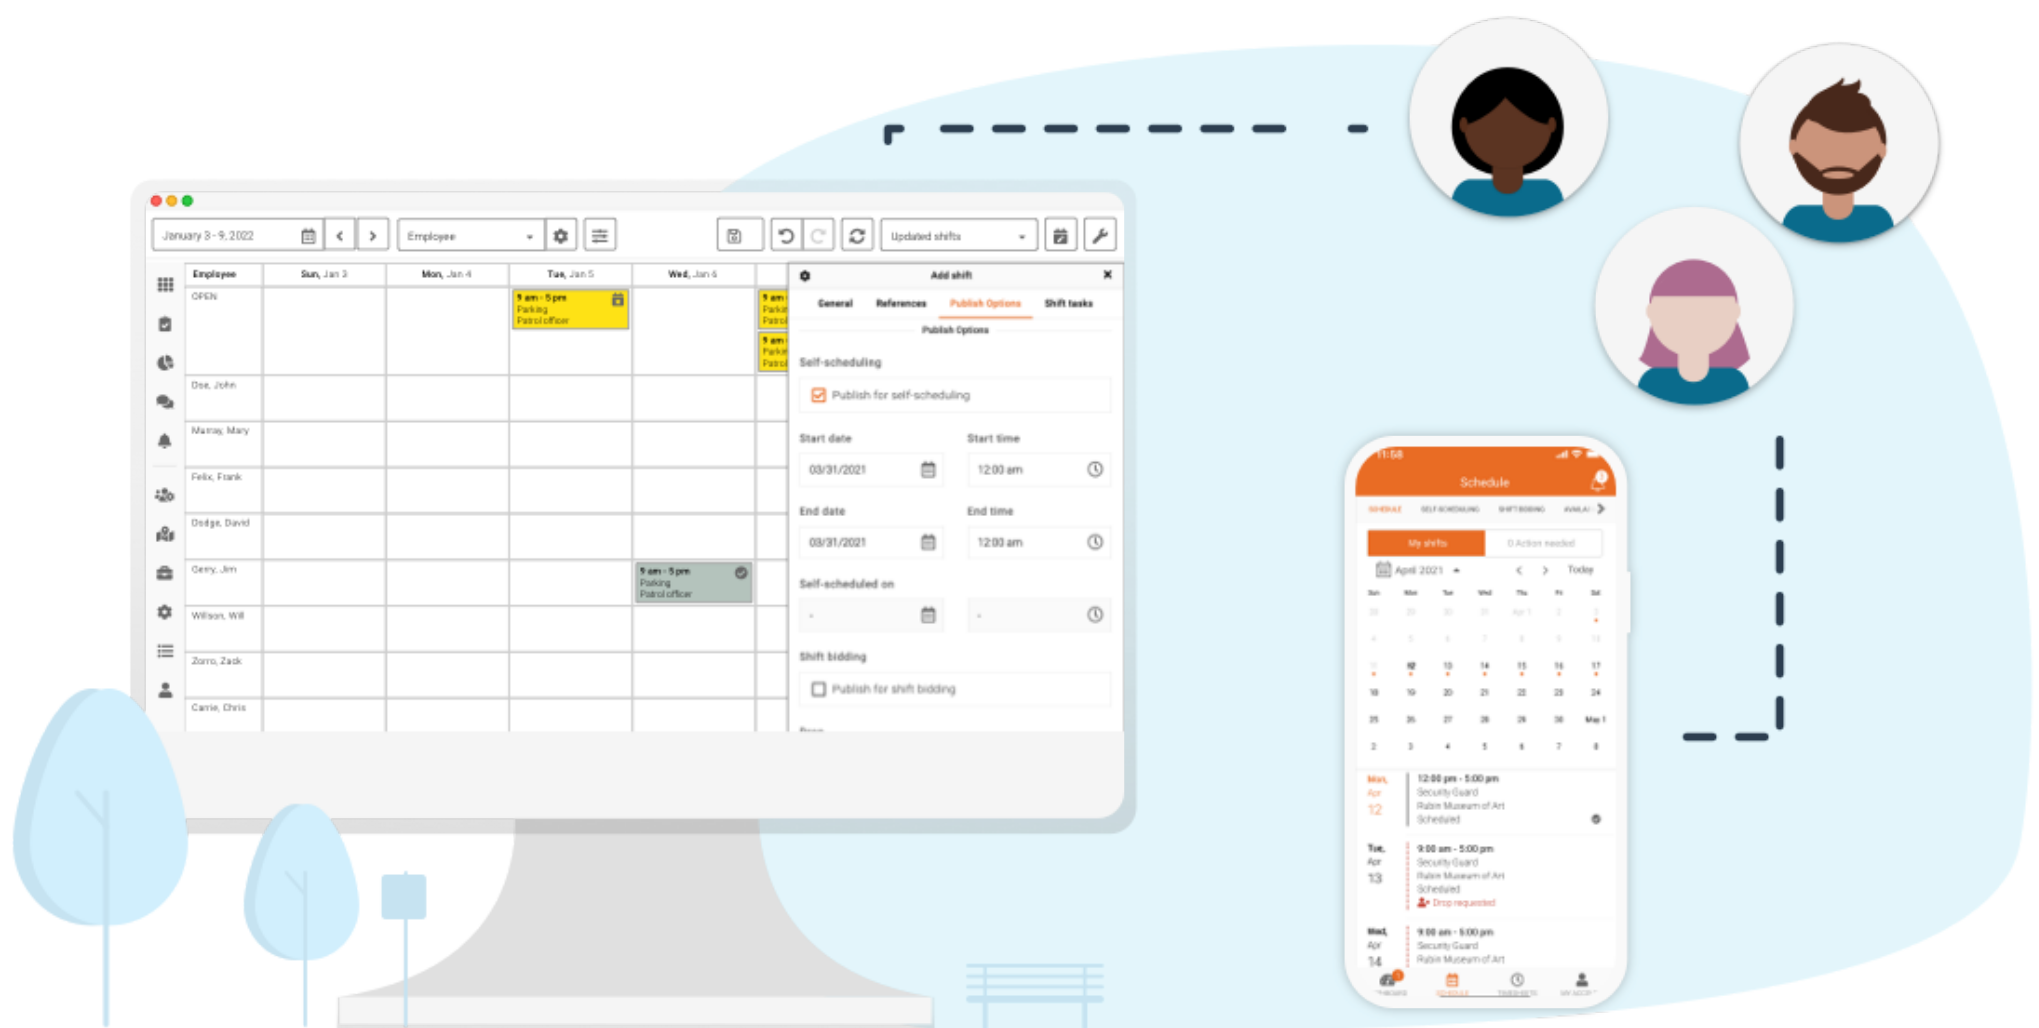

UNAUTHORIZED OVERTIME

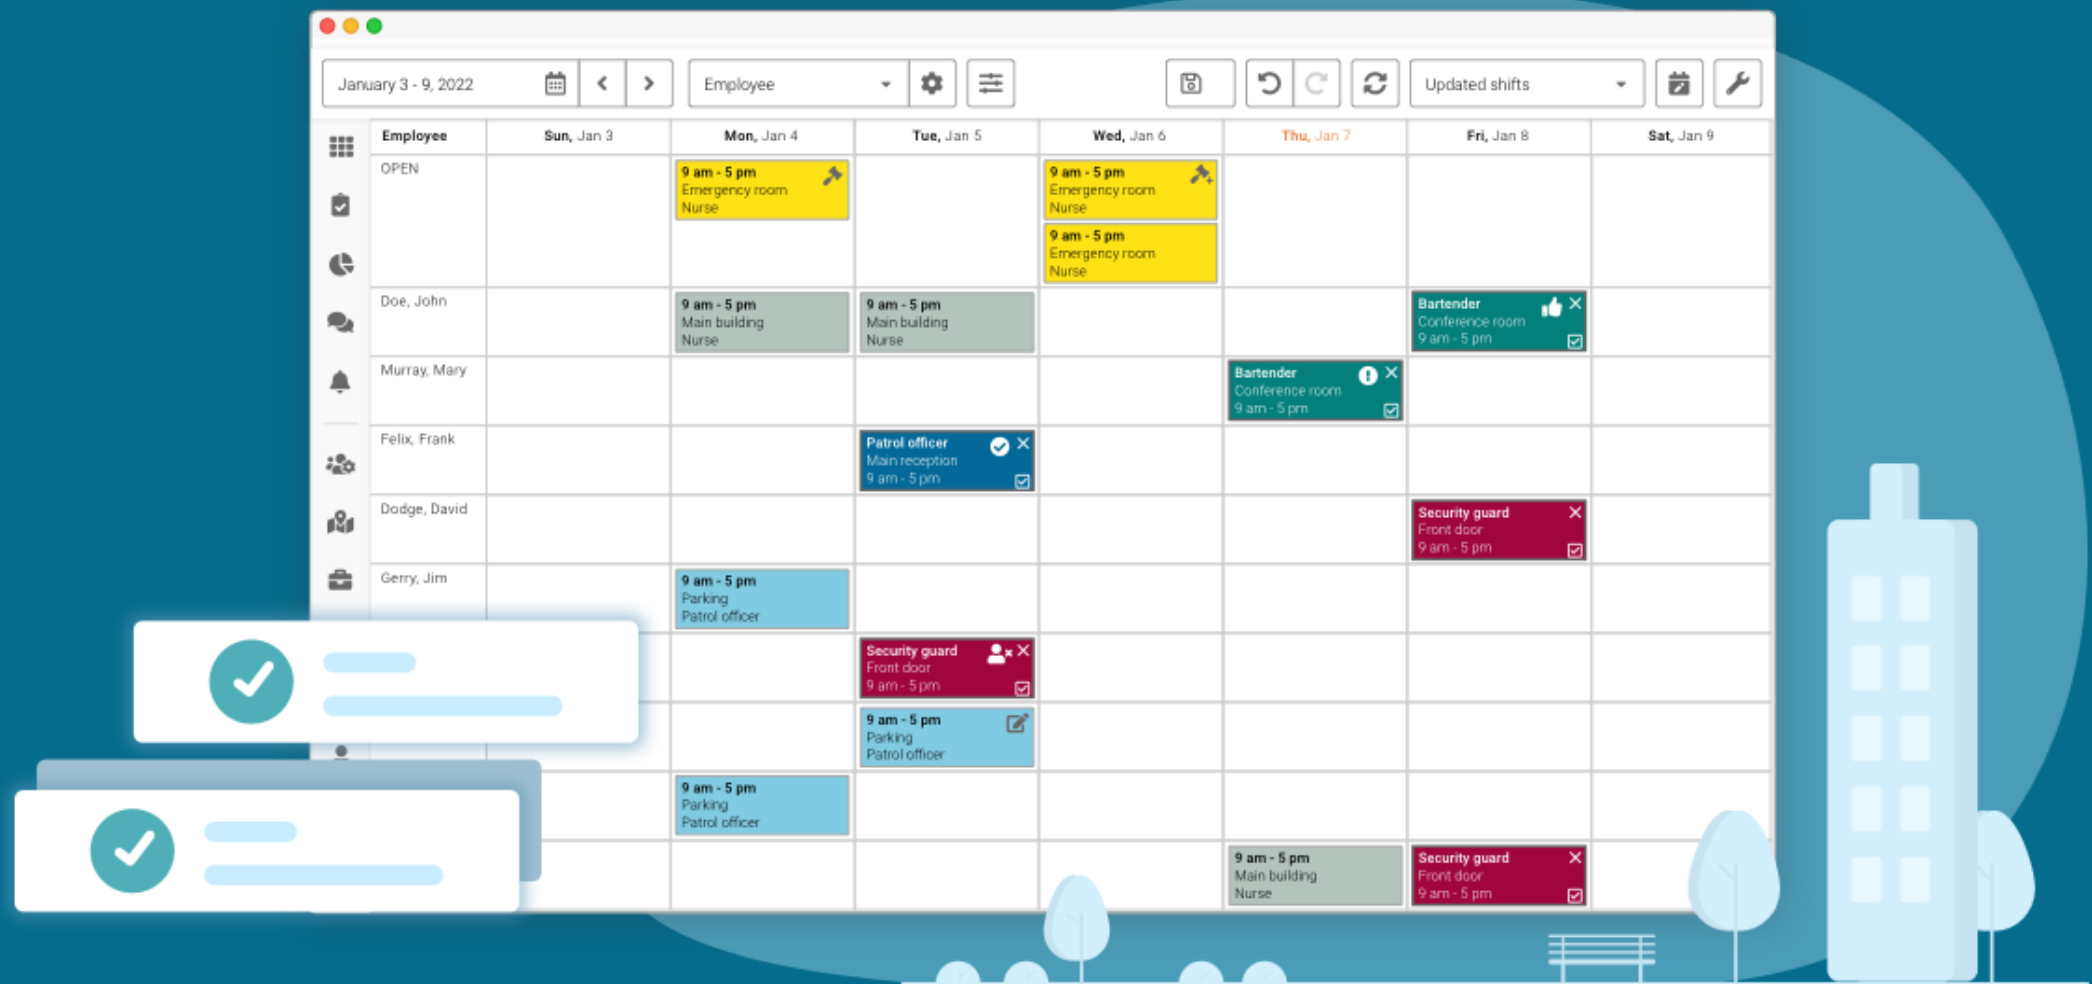

Prevalence: No proper clocking system and lack of supervision.

SOLUTION:

Time Tracking Software and Scheduling Rules Engine ensures overtime is justified and allocated fairly.

Eliminate timesheet fraud with Celayix's Employee Scheduling and Time and Attendance Software, recovering up to \$2,600 per employee per year.
