EMPLOYEE EXPERIENCE

Employee Flexibility That's Easy on Managers.

Self-scheduling and shift bidding give team members more control. Celayix keeps the operational rules in place, so availability, qualifications, conflicts and coverage still count when the workflow gets more flexible.

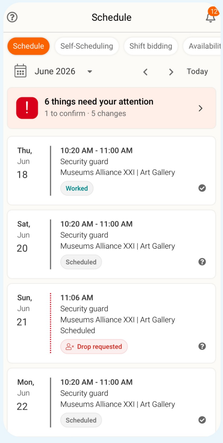

HOW IT WORKS FOR TEAM MEMBERS

One App, Three Tasks, Handled

Real-time, 24/7/365 access from any smartphone.

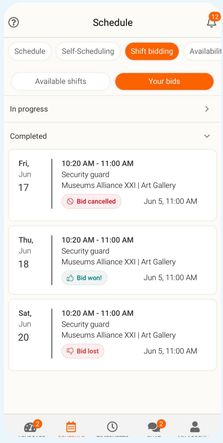

1 See Shifts

Upcoming shifts, changes and site details in one view. Confirm shifts and acknowledge changes in a tap.

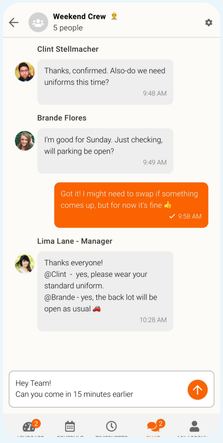

2 Pick Eligible Open Shifts

Self-schedule or bid on open shifts. Each pick runs through your business rules before it's confirmed.

3 Communicate Changes

Group and one-to-one chat with supervisors and the crew. Questions get answered without phone tag.

OPERATIONAL GUARDRAILS

Flexible for Employees. Rule-Bound for Operations.

Celayix's rules engine checks every self-scheduled shift and bid, so managers aren't left cleaning up after flexibility.

Employee Picks a Shift → Rules Checked → Shift Confirmed, Schedule Updated

Availability

Team members are only offered work when they've said they're available.

Qualifications

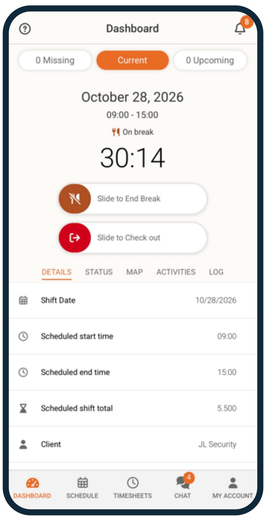

Skills, certifications and site requirements are matched to each shift.

Conflicts

Overlapping or double-booked shifts are caught before they land.

Coverage

Drops and swaps are reviewed so required staffing levels stay met.

ON SHIFT, TOO
